A MESSAGE FROM THE COMPOSER

WHAT YOUR PURCHASE SUPPORTS

Dear Musicians,

Thank you very much for your purchase! I include this message with all my works to share a bit about what supporting a self-published, “small-business” composer means:

When I began composing, I committed to ensuring that my music would give back. This vision has grown into **Music4More**, an initiative that connects every sale, commission, and consortium to something bigger than just the notes on the page.

Because of purchases like yours, I’m able to:

- **Provide discounts** to Title I programs, low-income schools, and students.
- **Support ensembles and organizations** that create access to music in their communities.
- **Fund and organize projects** that partner with nonprofits and causes making a difference.
- **Support artists and small businesses** by investing in real people — from print shops and creatives to using sustainable packaging whenever possible — rather than relying on the cheapest mass-produced options.

To date, Music4More has invested **thousands of dollars** into these projects — and every legal, responsible purchase helps grow that impact while allowing me to continue creating meaningful music and earning a living as a composer.

What You Can Do	Not Permitted
• Print/make copies for the licensed performer or ensemble connected to this purchase. • Share the music with your ensemble members for rehearsal and performance. • Perform publicly in concerts or contests, with credit to the composer	• Sharing or distributing this music to performers or ensembles who have not purchased it. • Uploading PDFs to public websites, file-sharing platforms, or social media. • Removing watermarks or altering score markings without permission.

If you’re ever unsure, please email me. I’m glad to clarify permissions or help find a solution. If you know a school, ensemble, or friend who would love to perform this music but faces financial constraints, please encourage them to reach out.

Enjoy the music, thank you for your support, and please stay in touch!

PROGRAM NOTES

Distant Promises takes its inspiration from the experience of traveling west from Denver along Interstate 70, as the distant mountains gradually begin to close in. What first appears as a far-off outline slowly becomes an overwhelming presence, until the road is surrounded and the view ahead narrows.

At the Eisenhower Tunnel, the landscape suddenly gives way to artificial light, concrete, and enclosure. Yet even there, the distant glow at the end of the tunnel suggests what is waiting beyond. When the road finally emerges back into daylight, the view opens all at once to a vast sky, massive mountains, and a sudden flood of color and open space.

The music reflects this sense of anticipation and arrival. Throughout the piece, brief moments of beauty appear and fade, each one seeming to point toward something greater just out of reach. That promise is finally fulfilled in the expansive Maestoso near the end of the work, where the music opens into its fullest and most luminous statement.

PERFORMANCE NOTES

TO THE CONDUCTOR

While specific meters, tempo indications, and expressive markings have been included where the composer feels they are essential, the interpretation of this work should remain flexible and deeply musical. Many passages invite subtle moments of breath, space, and forward motion that may vary depending on the ensemble, hall, and pacing of the performance.

These markings are not meant to restrict the conductor's musical judgment, but to clarify the moments when the composer feels a particular sense of motion or suspension is especially important. In all other places, conductors are encouraged to shape the music freely and allow it to breathe.

AUDIENCE-INTEGRATED PERCUSSION (OPTIONAL)

At least two percussionists should be placed in the audience with the lowest-pitched suspended cymbals available. Tam-tams may also be appropriate, depending on the hall and desired color. The goal is not to overwhelm the audience, but to create the physical sensation of being gently surrounded by sound.

This effect is intended to give the audience a brief glimpse of the immersive feeling performers often experience when sound surrounds them from within the ensemble. The primary musical material on stage should always remain clear and dominant. The audience-integrated percussion should be balanced carefully so that it enhances the atmosphere without distracting from the ensemble.

Placement, instrument choice, and balance should be determined by the conductor and percussionists based on the performance space. It is perfectly acceptable if only part of the audience experiences the full spatial effect. In many cases, that may be preferable to over-projecting the sound throughout the entire hall. The effect should feel distant, resonant, and enveloping, never harsh or startling.

If the hall, ensemble logistics, or available personnel make audience placement impractical, all percussion may be performed from the stage.

In the final measure, the audience-integrated percussion entrance should be almost imperceptible to much of the audience. It is meant simply to extend the resonance of the stage sound, as though the final sonority continues to shimmer in the hall after the ensemble has released.

MEASURE 57

At the Maestoso, the indicated spatial gesture from low to high instruments should be shaped according to the ensemble's setup. Because wind ensemble seating arrangements vary widely, a perfect physical sweep from the lowest instruments to the highest may not be possible. In general, the gesture should move from the area of the ensemble where the lowest voices are seated toward the area where the highest voices are seated.
